***Affordable Healthcare for Businesses  
in the Florida Keys***

Hello, we understand how important it is for your employees to have “Peace of Mind” about their healthcare, and the cost can be overwhelming. According to the U.S. Chamber of Commerce, small businesses employ nearly half of the American workforce, and yet only 30% offer health insurance, down from 47% in 2000, as rising premium costs drive small businesses to drop health benefits. KeysKares enables small businesses to enroll their employees and their families at a low monthly rate of \$80, with discounts available for larger groups.

***Benefits include:***

Unlimited doctor / preventive care visits / No co-payments / No co-insurance / Three convenient locations (Key West open 7 days a week / Marathon / Key Largo) / On-site diagnostic (X-ray / CT / Labs / Ultrasound / MRI) / Quick and easy enrollment with same-day visits

Transparent pricing: \$80 per/mo. adults (\$2.66 per/day) / \$70 per/mo. children up to eighteen, discounts for groups of 10 or more!!

*Advanced Urgent Care (AUC) recognizes the challenges of delivering quality healthcare benefits to employees and their families. One trip to the ER can easily exceed \$2,000 before any procedures are performed.*

For this reason, *KeysKares* can be a huge incentive to recruit and retain valuable employees.

To learn more about our program, *contact Cindy Miller, KeysKares Membership Coordinator, directly at (786) 463.6237 or visit the website at www.membership@urgentcarefloridakeys.com.* We are excited to help you provide quality healthcare to your valuable employees.

Thank you,

***Richard Graefe,***

**Tubby's Creek Bridge on  
Card Sound Road, built in 1969,  
scheduled for replacement starting  
Feb. 9, 2026.**

**Feb. 9** - Construction crews will be on-site to perform preliminary project work consisting of clearing vegetation from roadway shoulders and widening the pavement at Tubby's Creek Bridge on Card Sound Road. This work will take four weeks to complete. During this time, the shoulders of the roadway will be closed, but both lanes will remain open for two-way traffic.

**March 9** - The contractor will close the eastbound lane to traffic and set up temporary traffic signals to alternate bi-directional traffic to one lane so demolition of the eastbound lane may begin. The bridge will remain one lane with alternating traffic for the duration of the project. Traffic signal timing will be altered in the morning and afternoon to accommodate the additional traffic heading to and from the Ocean Reef community. Updates will be provided throughout the project's construction phases. This project has a construction duration of approximately 18 months, weather dependent.

# From the Nurse's Corner

by Stephanie Irvin R.N.

## February Health Topic 2026

February is American Heart Month....so in honor of Valentine's Day, February 14, let's discuss a syndrome that most people don't hear about often....

Broken Heart Syndrome, or Takotsubo cardiomyopathy, is a temporary weakening of the heart's main pumping chamber. It's triggered by severe emotional or physical stress. Symptoms include chest pain and shortness of breath that mimic a heart attack. Causes are a sudden surge of stress hormones like adrenaline.

Diagnosis involves tests like ECG and echocardiogram to rule out a heart attack and confirm the characteristic "octopus trap" shape of the heart.

### What is Broken Heart Syndrome?

Also known as stress cardiomyopathy or Takotsubo cardiomyopathy, it is a sudden and temporary weakening of the heart muscle. It is usually triggered by a physically or emotionally stressful event, though sometimes the trigger is not identifiable.

The name "Takotsubo" is Japanese for "octopus trap" and refers to the characteristic shape

the heart's main pumping chamber takes during an episode.

### Symptoms

- \*Sudden, severe chest pain or pressure
- \*Shortness of breath
- \*Weakness
- \*Palpitations
- \*Cold sweats
- \*Lightheadedness or dizziness

### Causes

A sudden surge of stress hormones, such as adrenaline, is believed to be the cause, damaging the heart muscle temporarily.

This can be triggered by intensely positive or negative emotional events.

Examples of emotional stressors include the death of a loved one, grief, fear, or even a happy event like a wedding.

Examples of physical stressors include a serious illness, stroke, seizure, or significant bleeding.

### How is it diagnosed?

A doctor will perform several tests to rule out a heart attack. These tests can include an EKG,

echocardiogram, and blood tests.

An angiogram may be performed to check for blockages in the coronary arteries. During the evaluation, a doctor will look for the characteristic ballooning of the left ventricle, which distinguishes it from a heart attack.

### Treatment and outlook

Treatment for broken heart syndrome is similar to treatment for a heart attack until the diagnosis is confirmed.

Most people recover completely within a few days or weeks, with no long-term heart damage.

Recovery is often complete within about a month.

Follow-up appointments and tests may be scheduled to ensure the heart is functioning properly again.

From all of us here at The Time Out Magazine, The Nurses Corner, have a Happy and healthier Month of February!!!

**Self Love Tip – if you find yourself all alone this Valentine's Day, do something proactive, find a codependent support group and learn something new!**

### Mile Markers – What's the Deal?

US 1 is used to travel the islands of the Florida Keys.

Location: along the highway are expressed by Mile Marker numbers. The ZERO Mile Marker is found in Key West. Mile Marker numbers continue to increase until the pass through the Monroe County line at Mile Marker 112, north of Key Largo.

Look for small green signs with white numbers posted at each mile along US 1 (these used to be the original mile posts installed along the old railroad bed).

Special note: Mile marker references are commonly used in local addresses. When there is a B or O this denotes either Bayside (north-Gulf of Mexico side) or Oceanside (south-Atlantic Ocean side) location.
